2024 Chippenham & District Wheelers Evening Time Trial Reports

Jack Nunn 10 Mile Time Trial - UC866 "Q" Course - 24 April 2024

On a cool, dry evening we had 13 riders which meant Sue had to be quite sharp to get to the finish on time as the finish location for the "Q" course is in Dauntsey. Although not a strong headwind MyWindSock reported a 75% headwind, which may explain some of the times. Paul managed to get his distances wrong for the warm up and found the group poised to finish sign on as he made it back with 60 seconds to spare. Nick English on his first appearance this year took the honours.

UC861 Jack Nunn 10 Mile Time Trial - 17 April 2024

So normal service resumed tonight with no roadworks and the finish stretch whilst wet, at least no longer flooded. Despite the sun the evening was surprisingly cool which left people reaching for winter layers under skin suits and full fingered gloves. Matt led the way with a storming ride, showing he is on form for this year. The rest of us were a bit slower than our averages (I think) based on my time and my gap to Simon. Niamh manged to go off course by going straight on after the M4 bridge, clearly hoping that we were just doing a 5 miler again. A reminder to me to check people do know the course, even if they have ridden it before.

Next week the plan is to ride UC866 aka the Q course.

https://www.chippenhamwheelers.org/.../chippenham.../... Meet at Queen's Field as usual.

UC861Z 5 Mile CATI Time Trial

After several changes of course due to road condition we settled on a new course UC861Z. This variant started in Sutton Benger and finished about 400 yards beyond Dauntsey Park S bend. Clearly 5 miles is an attractive distance as even on a damp and drizzly evening we had a good turn out with some new faces and some familiar faces returning. Nick Ferris tried to claim he qualified as a CATI rider but it was pointed out with his history that was never going to fly. However, John and Stewart both set PBs for 5 miles as this was their first time trial. Looking at the results it is clear that Simon Kay's new slim line model is going to threaten the established order as he stormed to victory. With a short course and the worsening roads (and weather) all bar Niamh turned out on road bikes. Paul Freegard even rode his lovely steed which is going to need a good clean after tonight. Paul was trusted with the start by Sue but still has his training wheels on when it comes to time keeping. He was assisted by Midge who helped him bring in the signs after the event and she has promised to ride a 10 later in the year.
Normal service should return next week with UC861 as the Jack Nunn course as all roadworks are meant to be gone. Sadly the road conditions will not have improved.

Hilly Time Trial - 3 April 2024

Last night saw the first of the club evening time trials for 2024. A new season, a new meeting place on the new hilly course which goes up Callow Hill to the Brinkworth Road (UC868S). As registration time drew closer Sue and Paul were getting concerned that despite the detailed email, the texts and club website that Paul was going to be very lonely. However, at the 11th hour riders began appearing having chosen to ride from Chippenham or Sutton Benger as a warm up. It was a strange day - the roads were dry, the sun was out and it was not raining but it was a tad windy.

In the end we had 6 riders and Niamh showed her form by beating the Chippenham riders. Paul Freegard requested, nay demanded, the results showed that he was riding his Mercian fixed wheel, non carbon road bike - but there are no prizes for that in this event. (Picture - Paul espousing the benefits of a fixed gear up a hill.)

Next week is of course the 5 mile Come and Try It event. Meet at Queen's Field, Sutton Benger.

Chippenham Wheelers PYOB / Random 2 Up Time Trial - 8 May 2024

The second running of the Pick Your Own Buddy 2 Up (or Billy No Mates for the random or "you are riding with me, whether you want to or not") was held on a sunny, warm and really still evening; unlike last week's cold and wet evening where the 4 of us agreed not to bother racing.

So we had Paul and Emma, with Paul on his latest TT creation; a Cervelo P2 adapted to a fixed single speed (so we have had classic road bike single speed, road bike, TT Frankenstein so far this season). Paul and Peter with Paul trying out a new front chain ring having dropped from 58T to 55T to see if that actually increased his cadence or just meant more time in the 11T at the back (Peter can answer that question). Simon and James both on TT bikes for once and finally Jamie who was last to arrive so had no one to pair with but rode a cracking ride on his own (that was after Robbie refused to be persuaded into pairing with him).

After a discussion between Paul and Peter about being driven to higher performance standards I did some analysis of data from Strava. Sadly it is incomplete as everyone has a different subscription or just lacked the data. However, what can be seen is that Peter seemed to have to work quite hard.

Marc Bowell photography was there to record our efforts and hopefully his pictures will follow shortly.

UC862 25 Mile Time Trial - 15 May 2024

The roadworks had all disappeared (phew) and we were able to use the course running from Chippenham to Sutton Benger and then 2 laps of UC861. It was a lovely sunny and relatively still evening. Neil was as usual fashionably late but at least intact having taken a tumble whilst abroad before his triathlon event. Paul was laying down excuses and was aided by encountering a tractor and horses on the course for his poor showing. Whilst Peter is missing from the list complaining of tired legs.

Next week the plan is to race UC867, the P Course - starting at the finish - and then go to the Wellesley Arms, Sutton Benger to meet up with the leisure riders for a club night.

Jack Nunn Time Trial - 22 May - UC861

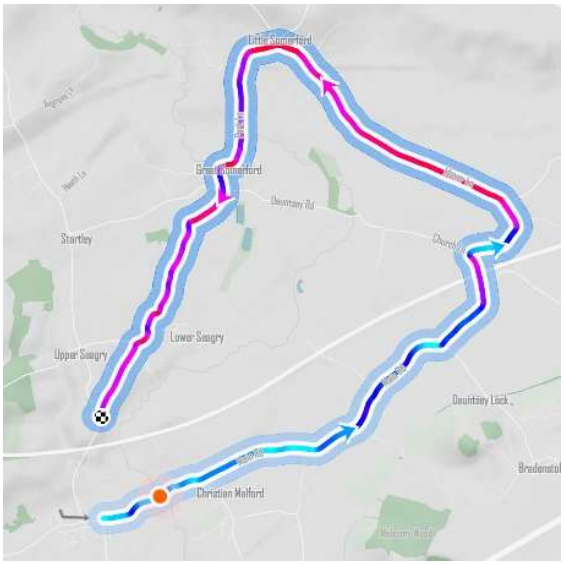

After an afternoon of foul weather many decided not to ride and a quick ride out on the planned course showed that the road to Dauntsey Manor from Great Somerford was buried under mud. However, UC861 was mostly dry with only our new puddle crossing the road at the finish. So many show a "LMF" and choose to stay at home, missing out on what turned out to be a good if slightly breezy evening.

Before turning to the results Matt Chapple quite correctly pointed out that last week he broke the Strava course record for UC862 with a time of 56:25 (Strava) beating the previous record by 14 seconds set in 2017. He was reminded that records need to be claimed as I am not, despite rumours, all seeing. However, well done Matt - we now expect to see some of the Open records tumble.

Some may have seen the photo of the results with Matt's start number amended. The answer to "why" is he shipped his chain on the start line and Sue very kindly gave him 2 minutes to sort it out but even with a 2 minute penalty he would have been 1st! MyWindsock showed a tailwind on the out, headwind on the turn and crosswind on the finish leg - the drying roads and the change in perceived effort bore this out.

Some of the riders are planning on riding the new Sherston Course tonight where forecast is dry but cold. Be interesting to see how another local club 10 feels compared to ours.

UC861 Jack Nunn 10 Mile Time Trial - 29 May 2024

Despite the drop in temperature and a threat of rain we had a good turnout. Paul choose to change the course to UC861 as the UC866 course had a lot of dried mud on it and had it rained it could have turned slippery, plus there seemed to be a lot of tractors out so caution prevailed. Queen's Field meeting point felt a little crowded as Alan (the farmer) was working in one of the barns so we had lost some of the parking but it was nice that he was concerned that he was in our way - on his land 🙂. Robbie played the role of photographer as he was clearly resting before this weekend's 25 mile time trial and apparently the fact some of us are in frame is progress (conversation between Jamie and Robbie so am not speaking out of turn). Sue once again kept time and now has a smart new waterproof timekeepers board which we are hoping will guarantee no rain at events where she is timekeeping.

Paul worked hard to produce his best time of the year on an evening 10 spurred on by the thought of catching Paul, which he did at the "S" bends which meant a short pause before he could overtake. You will note from the photo that Paul and Mick had a few changes of places and when Paul was behind them could have sworn they were having a conversation. It was nice to see Mick back to racing, as he conditions his new knee! It was also good that Neil had persuaded a Chippenham Tri member to accompany him, welcome Lee, and we hope to see more triathletes joining us. Jamie said he went out hard to hold off Matt but in the final event he could have taken it easy as Matt sadly punctured and rode in just as Sue was about to drive back down the course to find him.

Next week is the Lottery 2-Up, so Paul needs to know if you intend to compete so he can do the draw on Saturday 1 June and calculate (guess) handicaps before he is too tired after running the club open on the Sunday to do the math.

UC861 Lottery 2-Up 5 June 2024

Who would be a handicapper, as 2 teams massively outperformed previous outings and one team were virtually spot on. It was a lovely evening for a time trial with a stonking tail wind out to Dauntsey giving the pairings a chance to settle into their rhythm. Congratulations to Mick and Andrew for winning the handicap 2 up on handicap and to Simon and James for being the fastest pairing.

FINISH

UC862 Hinder and Gerald 25 Mile Time Trial

At one point we had 17 pre-entries for the club 25 mile time trial competing for the Hinder (open) and Gerald (women) Cups and a Handicap Medal. On the night there were a few no shows who had apologised but not before Sue had prepared the start sheet, so we had a few blanks; so not everyone had someone to chase down. It was an almost perfect evening, dry, warm and very light winds and very little traffic.

As always the handicapper was presented a real challenge as the winner underperformed against their previous outing on the course by 2 min 18 secs and the handicap winner overperformed by 2 min 34 secs. However, at least the handicapper did not win the handicap medal much to his relief.

So joint first were Matt Chapple and Jamie Richardson-Paige with a 58:44 and Matt wins the Hinder Cup. The winner of the Gerald Cup was Lynsey Carpenter with a 1:04:31, outperforming her time from May this year.

The pictures show a happy bunch of racers and our winners/joint first riders. Robbie didn't ride but supported at multiple points around the course, clearly resting before next week's 50 mile time trial.

UC864 Nixon and Edwards 50 Mile Time Trial

It has to be said the for once the nearly longest day had almost perfect weather. The sun was out but it wasn't too hot, the wind was blowing but the headwind on the out to Dauntsey was really light and overall MyWindsock gave the weather impact as 1.2%. After some discussion about courses we were about to ride a variant of U86/50 as there were due to be roadworks at Dauntsey. However, following a drive of the course it transpired that the roadworks were being done in stages – so we reverted to UC864 and riders were contacted via WhatsApp, FB Messenger and telephone calls. Having had 7 riders registered to ride you will note that only 3 hardy souls braved the challenge of a 50 mile time trial. They were rewarded by being the first riders to race the newly surfaced road from the M4 bridge to the right turn – yes the lunar landscape has gone. Next week we are hopeful that a large section of the road leading the M4 bridge will also have been resurfaced, although sadly not the section from the left turn at Dauntsey.

It was great to see Mike Edwards out with Sue to watch us race tonight and he with Robbie Richardson shouted words of encouragement. Those that have not raced UC864 may not be aware of the temptation to call it a day at lap 3, as by then it is hurting and you know approximately what your time is going to be.

The course had a few issues with horse riders – where when calling out loudly "rider approaching" my voice was enough to spook one of the horses and it then skittered across the road. Then we had the usual selection of man eating tractors, thankfully no one met them at the S bends but still alarming. Sue set us off at 2 minute intervals which resulted in a catch at Sutton Benger on lap 3 as

Simon overtook Paul, caught Lynsey and then Paul caught Lynsey – so we had a short moment of 3 up riding.

Rank	Competitor(s)	Club	Predicted Time	Actual Time	Handicap Time

UC865S Sporting 10 - 26 June 2024

On the hottest day of the year some brave souls signed on to ride the Sporting 10 skirting Malmesbury. The course has 3 good climbs and some rollers. So Nick English's course time of 22:39 is impressive given it would beat many riders on our flatter course 10 and is also a new course record (breaking the 2013 record by 15 seconds). Mention must also go to Emily for riding the course on a Mountain Bike (madness) and becoming the third fastest woman on the course. No doubt if she had

ridden a road bike she would take the QOM for the course. It was great to see Robbie riding (not racing in his view) and as always he bought great humour to the pre and post race chat.

Sheila Edwards Cup 10 Mile Time Trial - UC861 - 3 July 2024.

10 hopefuls lined up to compete for the Sheila Edwards Cup and the handicap medal. It was a warm but very blustery evening and there was some concern over deep section front wheels. MyWindsock

showed a tail wind to Dauntsey but most riders did not agree this on feel alone and for the first time ever on over 150 rides of the course the cross wind on the gaps from Dauntsey to Little Somerford felt very real for me. Fortunately the dark clouds did not premise rain, so we were able to enjoy the new tarmac to the turn after the M4 bridge without worrying about wet roads. (The logic of which bits of the road have been resurfaced defeats me.)

When the results were in the club winner of the Sheila Edwards Cup was Matt Chapple for the third year in a road, building up a good wine cellar with an appropriate bottle of wine. Peter Iffland massively overperformed to win the Handicap Medal, continuing his good form from the weekend 10 where he beat Paul Winchcombe but said his handicap should not be adjusted. Paul very kindly gave him a lift to the event to enable this victory.

Emily Lockwood again made a bizarre decision to ride on her mountain bike meaning of course that her handicap was well off. Simon Vannerley from Sherston Velo had his handicap based on by how much he beat Paul W on the Sherston 10 - clearly local knowledge plays a part in course times.

Jack Nunn 10 Mile Time Trial - 10 July 2024 - UC861

After a warm and sunny afternoon we had a slight weather change as the clouds rolled in, the wind got up and the temperature dropped. However, we still had 10 entries for the next of the Jack Nunn series of 10 mile time trials before we take a short break and do a couple of hilly time trials. Matt Chapple did well to better his time of last week, as most people were over 15 seconds or more slower. It was great to see Adam Warbey turn out for his first time trial with the club and of course set a Personal Best. Jack Nunn 10 Mile Time Trial - 10 July 2024 - UC861

After a warm and sunny afternoon we had a slight weather change as the clouds rolled in, the wind got up and the temperature dropped. However, we still had 10 entries for the next of the Jack Nunn series of 10 mile time trials before we take a short break and do a couple of hilly time trials. Matt Chapple did well to better his time of last week, as most people were over 15 seconds or more slower. It was great to see Adam Warbey turn out for his first time trial with the club and of course set a Personal Best.

Matt is currently leading the Jack Nunn handicap points competition but although the table doesn't show it Peter Iffland with a few more rides like the last 2 weeks could easily leapfrog to the top of the table.

UC865S Somerford to Seagry 10 Mile Hilly Time Trial

A double helping of results here as I was away last week and am playing catch up. The courses were switched around due to the Callow Hill course needing turn signs and my being away but of course the best laid plans went astray as the council decided to top dress the Idover Lane making it unraceable. So it was back to UC865S for the third time this year. The photos are all from 17 July where it was nice to see some returning riders. Despite delaying the start for Neil who messaged to say he would be at Queen's Field for 1835 hrs (which he duly was) he decided that having been severely held on course by traffic and tractors that he wasn't going to cross the finish line with a plus 30 minute time (much to the amusement of the finishers who were wondering where he was).

UC861Y Jack Nunn 10 Mile Time Trial - 31 July 2024

On a really warm humid evening we met for a new course having decided that the Idover Lane top dressing has not yet bedded in enough for safe racing. This of course meant that Tomas was in Sodom Lane waiting for us as he was not yet part of the WhatsApp group chat - thankfully as we had delayed the start time to give Neil time to make if from work, Tomas was also able to make it having had a good warm up. Due to Paul's miscommunication with Sue, Andrew and Emily stepped in to time keep (well I think Emily kept time, while Andrew tried his hand at photography). Having pre-ridden the course the finish was moved from the "Retreat" field turn onto the mown grass verge towards the tree to give that magic "10" figure. As to runners and riders - Neil had an outstanding ride given that he had a foot down hold with a tractor (witnessed by Adam, so it did happen) producing his fastest club 10 of the year. (See screen shot.) Neil was given a generous late start by the time keepers as he heard Paul say that the start would be delayed to allow Tomas to get to us - but not by that much! Paul having pre-ridden the course was properly warmed up (mind you on a 28C night did he need to) and having gone back to 58T ground out his second fastest club 10 of the year. Peter clearly was not feeling it, losing well over a minute on early season times. It was really nice to see Adam returning and improving his 10 time and I think it was Tomas' first club TT outing, so welcome.

UC861 Jack Nunn 10 Mile TT - 7 Aug 24

A good group gathered on a cool and blustery evening for another Jack Nunn time trial, encouraged no doubt by the plan to go to the pub afterwards. Nick bought his daughter along for her first time trial (so of course a PB) and then raided Paul's selection of bike lights. Alan was busy harvesting his fields around Queen's Field but was still happy to have us all parking in front of his barn whilst he manoeuvred his tractor - trailer combo around us. Nick, Matt and Neil continued to show their form with great rides. As a result as both Matt and Neil are on 6 rides we have a tie at the top of the Jack Nunn handicap table. Both need to make it to the future Jack Nunn events, as any absence could topple them from their position.

7 of us made it to the Wellesley Arms afterwards, where after a brief discussion about "power" and "data" most of the conversation seemed to focus on cricket! Well it is summer I suppose.

UC867 Medium Gear 10 Mile Time Trial - 14 August 2024

The annual running of the Medium Gear event saw the annual tussle between Neil and Paul (well it isn't much of a tussle except Paul failed to tell Neil of the course change so he nearly missed the start (it wasn't deliberate, honest - just arriving after the briefing meant he was missed). We had a few new faces, welcome, who have promised to return next year.

We used the "P" Course last night - start at the finish, right at the cross roads and left at the right for those in the know - as the Sutton Benger road is now due to have roadworks for the rest of the season. So the next 2 Jack Nunn events will use UC867.

Thanks to Paul Freegard for vocal support at the turn in Little Somerford, surprised he wasn't out on his medium gear but am sure he will be back.

Congratulations to Neil on once again winning the Medium Gear medal.

UC867 "p" Course -Jack Nunn 10 Mile Time Trial - 21 August 2024

There was a good turn out for the penultimate Jack Nunn 10 of the season. We were also graced with Lauren and Lisajayne as spectators who could not be persuaded to race. Sue seemed a little distracted which appears to be because she has been looking a new bicycle, but a time trial bicycle, in her new found status as a lady of leisure - or is that a lady with time to ride? It was a blustery and cool evening but that did not seem to affect Nick or Matt as they scorched their way around the course, with the new tarmac not seeming to slow them at all. Andrew's ride on a road bike was remarkable, apparently he was doing over/under efforts which made him faster than a normal steady effort. It was nice to see Hannah back and competing with Alex her Sulis Scorpions club mate.

UC861 Jack Nunn 10 Mile Time Trial - 27 August 2024

So the last of the evening 10 mile series returned to it's primary course with no roadworks, an improved surface from Dauntsey to Little Somerford and a record entry for this year, with 14 riders. It was a pleasant evening with a tail wind on the out, although MyWindsock did report more headwind than assist. Still the times were not bad with Paul recording his third best of the year for the course and achieving his weekly aim of defeating Peter (sorry, had to say it). Neil and Andy both continued true to form arriving lastminute.com for signing on, but they were there.

As Sue is away shortly on RAB the TTers presented her with some flowers (so she has time to appreciate them) and a bottle of (hopefully nice wine from a beer drinker) to say thank you to her for turning out each week in all weathers. The riders have the option of not being there but she does not and even on the wettest of evenings she lets the riders decide if we are going to race.

It was nice to see Robbie (on dubious photo duty) and Nicki, along with Mike Griffin supporting the final 10 of the year. It should be noted that Jamie rode his fastest 10 of the year for UC861 by some margin, which shows the benefit of riding a 12 hour a couple of weeks before as training.

The Jack Nunn results will be published later, once they have been double checked.

As a reminder next week is the Roberts Tankard Hill Climb on Bowden Hill as a warm up for the Open Hill Climb at the end of September.

UH80 Roberts Tankard Hill Climb - 4 Sep 24

Well that's a wrap. The final club evening time trial of the year saw some stalwarts gather at Bowden Hill in Lacock for the Roberts Tankard competition. It was disappointing to see so few sign on after last week's great turnout. Especially as Andy Cook made a guest appearance to be our start time keeper, as Sue cannot manage start and finish on such a short event. Andy Lockwood, having said he wasn't going to be there (raising Paul's hopes) arrived early having presumably "bunked" off work early, such was his desire to ensure that his name was on the tankard for a fourth year in a row. We were blessed with a cool and dry evening, ideal for Bowden Hill.

Andy had a storming ride, beating previous years times by 8 to 10 seconds and getting under 5 minutes. Robbie Richardson greatly aided the starters by holding us up at the start, always hard to get going on a hill climb if doing a clip in start. Paul managed to retain his record of going under 8 minutes but it was close, perhaps starting in the "big" ring isn't the way to go but in his mind the start of the course is "flat" and Robbie was quite alarmed to notice it. Jamie failed in the challenge of catching Paul before the first kick but still sailed past serenely shortly thereafter. Nicki was taking photos, as was Matt - who said he waited a few minutes before setting off so as not to overtake Paul while he was still racing (never a truer word said in jest, oh wait he wasn't jesting).

Our thanks to all riders for competing through the season, to Sue for timekeeping through all weathers and to various people for turning out to support us. Special mention of course to Robbie for developing his photographic skills during the season, which of course will not get better next year as he is promising to race!
